Claim 36 (New) A surgical towel, comprising:

a sheet of single-ply woven cotton fabric having four edges;  
at least one hem stitched in at least one of the four edges;  
a thread of a different color than a color of the cotton fabric for stitching the at least one hem, the color of the thread visually identifying the surgical towel as x-ray detectable; and

at least one piece of x-ray detectable material attached to the sheet of fabric by the thread, the x-ray detectable material protruding from the hem, the x-ray detectable material comprising shaped, coded, numbered, or identifying characteristics to identify an x-rayed object as a surgical towel.
